EDUCATION

University of British Columbia
Bachelor of Science, Computer Science

Vancouver, BC
Sep. 2022 - Apr 2027

WORK EXPERIENCE

Amazon May - Aug 2025
Software Engineering Intern Vancouver, BC

- Built an AI agent framework using AWS Bedrock for accounting and UI validation tasks on the Payments team.
- Reduced 80+ hours of manual work over 3 projects by building an AI framework for accounting cross-validation.
- Resolved 180+ tickets and saved 90+ QA hours by replacing a flaky system with an AI UI validation tool.

Tesla Jan - May 2025
Software Engineering Intern Palo Alto, CA

- Built automation for car registration, insurance, tax docs, and internal refactors on the finance automation team.
- Processed 100+ car fleets with an end-to-end bot that generates and processes certificates of origins.
- Automated over 2,000 car registrations per quarter with automated car registration software for Massachusetts.
- Saving approximately 16,000 hours of manual work by creating an automated car registration service.
- Accelerated test development by 75% by refactoring the OCR codebase for modularity and dependency injection.

SAP Jan - Sep 2024
Software Engineering Intern Vancouver, BC

- Contributed to developing SAP Analytics Cloud, focusing on bug fixes, feature work and optimizations.
- Increased test code coverage from 65% to 95% through feature enhancements, bug fixes and regression tests.
- Improved efficiency by 40% by refactoring existing code to optimize SQL calls and redundant database calls.
- Developed Selenium WebDriver tests to validate the rendering of UI components from various user flows.

ACD Systems Jun - Aug 2021
QA Analyst Victoria, BC

- Developed end-to-end automated Python test cases that would verify user flows were at the correct state.
- Gathered requirements for comprehensive test cases to ensure UI components were working end-to-end.
- Tested a variety of UI components on different operating systems and browsers to ensure compatibility.

PERSONAL PROJECTS AND EXPERIENCES

PlantPals Oct 2024
StormHacks - <https://devpost.com/software/plantpals-zf89td> Vancouver, BC

- Achieved best hardware hack and best environmental hack, building an integrated hardware and software plant analytics app.
- Developed a React Native mobile app with a Raspberry Pi and ESP32 hardware system using various sensors communicating data over a hosted network.

Booktrail Jan 2024
nwHacks - <https://booktrail.tech> Vancouver, BC

- Achieved 2nd place and best implementation of Mappedin SDK out of 750+ competitors, building a library navigator that takes you directly from book title to shelf.

Submarine Software Developer Sep 2023 - May 2024
UBC's Submarine Design Team - <https://subc.ca/> Vancouver, BC

- Spearheaded development of Python applications for real-time video streaming and sensor data display, enabling autonomous underwater course correction using OpenCV and in-house IMU data.

Machine Learning Engineer Sep 2024 - May 2025
UBC Agrobot - <https://ubcagrobot.com/> Vancouver, BC

- Developed a real-time system for frame analysis of maize clusters with the YOLOv8 model using PyTorch.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, C#, Assembly, SQL, JavaScript, TypeScript, HTML, CSS, R, Julia

Tools/Frameworks: Git, AWS, Node.js, Postgres, Redis, Selenium, MongoDB, GraphQL, Express, Docker, Jenkins

Data Science: OpenCV, Vuforia, PyOCR, PyTesseract, Tensorflow
